

WATER HEATER STAND w/Safety Clips

19" x 19" Top is 18 gauge with double return flanges on all four sides.

18" tall legs are 22 gauge tapered trapezoid shaped with double return flanges on both legs.

Safety clips are 18 gauge

Legs are securely riveted into position.

Not recommended for loads greater than 500 pounds.

MP-HTRS191918 Water Heater Stand

The MP-HTRS191918 stands safely elevate water heaters and other equipment above the floor. This unit is designed to support up to 52 gallon water heaters up to 19.5 inches in diameter. Stand is NOT recommended for larger water heaters. Stand is built in accordance with recognized UPC (Uniform Plumbing Code) and the (IPC International Plumbing Code) which requires elevation of water heater's ignition source 18" above the floor.

The heavy duty galvanized steel stand is corrosion resistant and will not "rot" like wooden stands. Two safety clips are supplied with each stand for securing the stand to the wall. It is recommended that Water Heater Restraints also be used in commonly seismic areas or where required by local codes.
